Total Pallet and Bin Solutions

Total Pallet & Bin Solutions

Since 1984 Timpack Industries Ltd has been at the cutting edge of timber-based packaging in New Zealand. Today it is a nationwide company that is by far the major supplier of timber pallets, bins, crates and drums to New Zealand's dairy, horticulture, meat, manufacturing and export sectors.

STRONG. DYNAMIC.

Timpack first started manufacturing pallets and bulk bins for the New Zealand dairy industry but rapidly expanded to produce a diverse range of timber componentry including boxes, crates, cable drums and furniture components.

Timpack's total pallet and bin management has expanded to include 3rd Party management and control systems.

Timpack employs over 240 staff and Head Office is in Hamilton with branches in Auckland, Hamilton, Mt Maunganui, New Plymouth, Nelson and Dunedin.

SMARTER. FASTER.

Timpack were quick to recognise the benefits technology could bring to the traditional timber industry.

Modern timber reprocessing plants use computer controlled machinery to produce an extremely high quality product that meets strict criteria for hygiene, robustness and load bearing.

Timpack's passion for customer service, utilising multi-site facilities, enables Timpack to provide unparalleled support to their customers' ever changing needs.

Timpack can customise any product to your specific requirements.

* International Standard for Phytosanitary Measures **International Plant Protection Convention

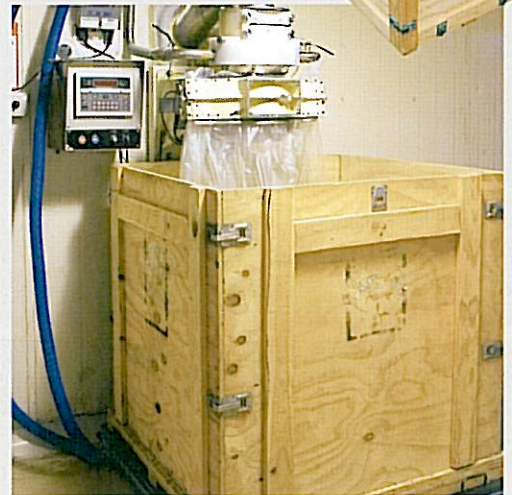

Export Requirements

Timpack was the first company in NZ certified to provide exporters with timber packaging that met the international standard recently adopted worldwide. ISPM15* requires all timber to be treated and free of infection at time of export and marked with the IPPC** brand.

Collapsible Bins

The safe and secure way to transport bulk product. Strong, fully-encased, collapsible bins simply unclip to give easy access.

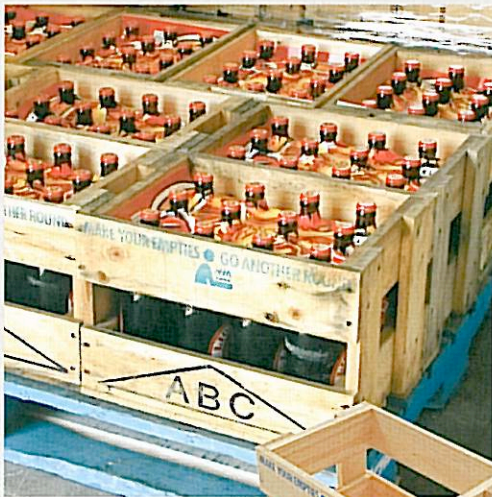

Picking Bins

When you want to lessen the amount of handling of fruit and vegetables, Timpack's Picking Bins provide the simple solution. They're hygienic, lightweight yet strong and come in a wide variety of sizes.

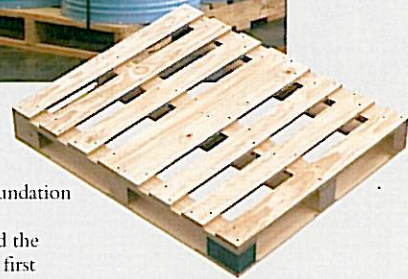

Cable Drums

Thousands upon thousands of kilometers of cabling have been unwound from Timpack Cable Drums over the years. These sturdy and practical Cable Drums are available in a variety of sizes and are indispensable to the building and upkeep of New Zealand's infrastructure.

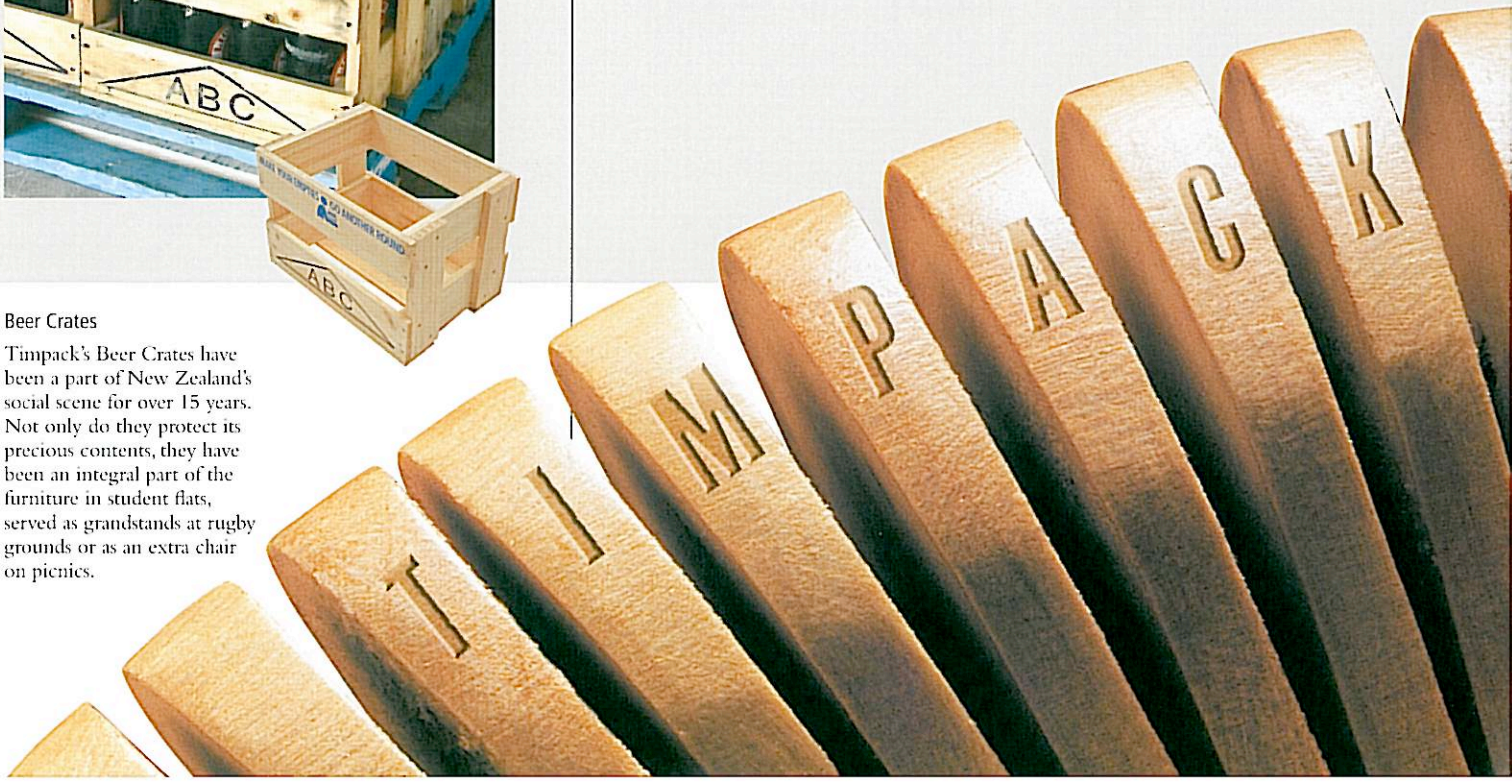

Beer Crates

Timpack's Beer Crates have been a part of New Zealand's social scene for over 15 years. Not only do they protect its precious contents, they have been an integral part of the furniture in student flats, served as grandstands at rugby grounds or as an extra chair on picnics.

Pallets

The pallet is the very foundation of Timpack's success. The pallet revolutionized the transport industry when first introduced and it is still the cornerstone of a cost-effective transport system. Available in a range of sizes in both 2 and 4 way entry configurations.

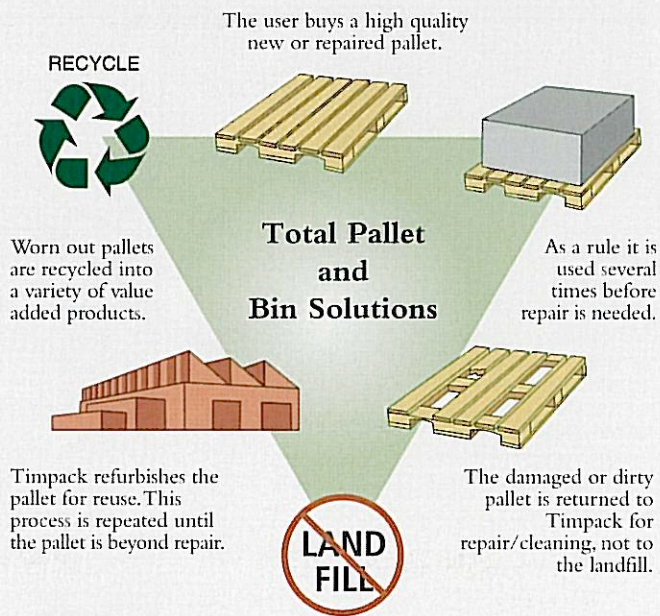

RESOURCEFUL. ADAPTABLE.

As a base for the product range Timpack uses only the pick of New Zealand's versatile Radiata Pine, a renewable and sustainable natural resource.

Timpack's recycling operations refurbish pallets and bins making better use of the timber resource and reducing the amount of timber packaging sent to landfills.
